DETAILED ACTION

1. The disclosure is objected to because of the following informalities: The specification appears to be a product of translation and as such contains verbiage and other construction that is awkward and non-idiomatic in nature. The specification should be reviewed and amended into proper idiomatic form. Appropriate correction is required.
2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim appears to be a product of translation from a foreign document and as such contains limitations and non-idiomatic phrases that render the claims awkward and indefinite. The term "or the like" as found in lines 1-4 has been deemed by the board of Patent appeals as an indefinite limitation in that the metes and bounds of the claim can not be determined in that "the like " is open ended in nature. Further it is not clear what makes for bending inner and outer circumferential side plate and an inner and outer circumferential sides and where such structure is located within the claim. Further "the front and rear sides" lacks antecedent basis. The limitation, "a protruded manner" is vague and indefinite in nature. Further "sliding contact surfaces" lacks positive recitation in the claim and clear antecedent basis.
3. Claim 1 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3725
